CLEANING SYSTEMS

DEEP SIX *Stable Emulsion Defoamer Concentrate*

Description:

DEEP SIX is a silicone antifoam which eliminates foam in recovery tanks of extraction carpet machines, automatic floor scrubbers and other industrial recovery systems.

DEEP SIX is non-corrosive and will not harm equipment.

DEEP SIX quickly eliminates foam which can greatly inhibit efficient recovery and continuous equipment use. Carpets that have been previously cleaned with high foaming carpet shampoo may cause excessive foam when cleaned by the extraction method. **DEEP SIX** in the recovery tank solves this problem.

Use Directions:

1. Add approximately 1 ounce of **DEEP SIX** for each five gallons of recovery tank or sink capacity.
2. When cleaning carpet that has been previously cleaned with high foam shampoo, vacuum diluted **DEEP SIX** into recovery hose and spray onto side of recovery tank prior to extraction cleaning.
