

# VENT-A-CAP

## Dispensing and filling features:

- Patented air venting technology eliminates negative air pressure and automatically vents bottle for continuous liquid flow.
- Closed loop chemical containment system eliminates drips, leaks and mess. Helps protect end-user.
- Anti-reversing dry break valve (optional). No back flow.
- Adaptable for mini or standard quick disconnect or luer fitments.
- Standard stainless steel spring or Hastelloy spring located outside of flow channel.
- Notched tube for more complete bottle evacuation.
- Barbed or threaded fitments.
